

Which broadband speed is right for you?

Speed - Mbps

Domestic Users

Business Users

2-10

Adequate for email, web browsing and online shopping.

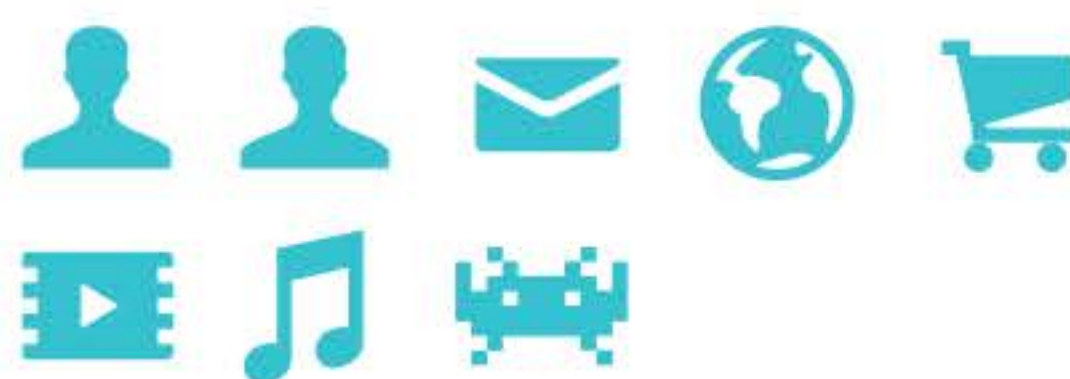

Most businesses would benefit from a higher speed than this.

10-20

Watch video, download music, single player gaming.

Run a small business. Up to 5 staff.

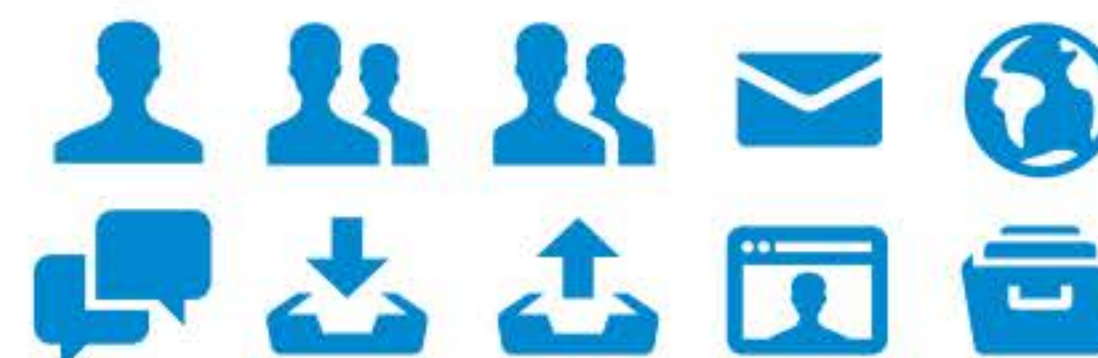

20-50

Large family all online together, multiplayer gaming, video calls.

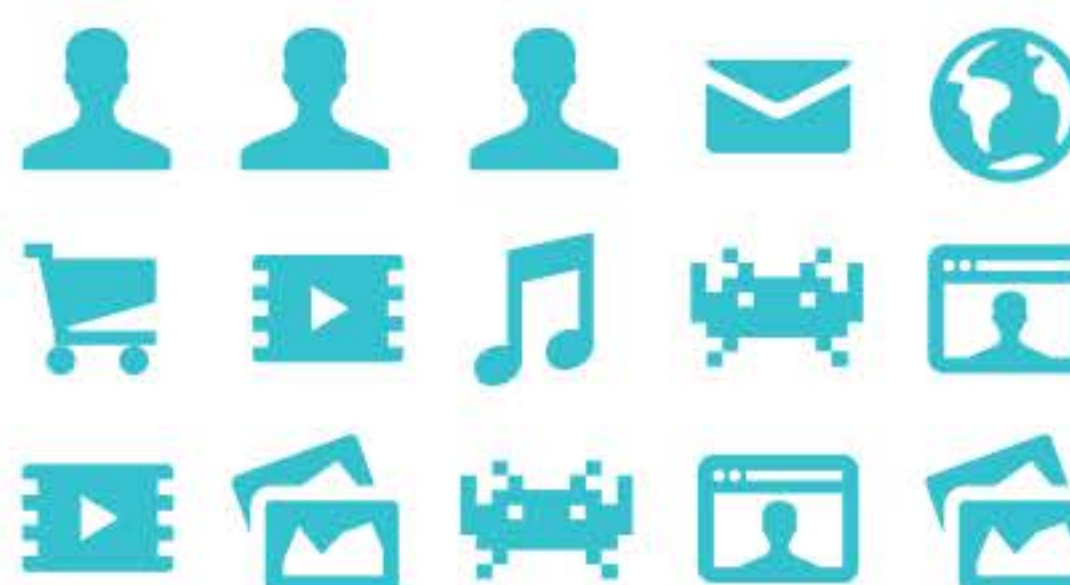

Adequate for most medium sized businesses. 5-20 staff.

50-100

Families making particularly heavy use of video, gaming, video calls and file sharing.

Larger businesses needing to upload large data files or use video calls extensively.

100 +

Very few domestic customers would need this level of speed.

For specialised businesses only, who have a specific need for ultrafast speeds.

You will pay for higher speeds, so it is important to choose the level that matches your needs.
